The introduction of new activities, especially in an area as complex as the Circular Economy, always requires support and direction. We are therefore pleased to be able to present our tool related to second result project, help you turn ideas into action - the "SME CE Skills & Readiness Verification Tool".

Introducing yourself to the topic of the circular economy may seem daunting, but our 'fiches' provides not only information, but also signposts to success.

What is unique? These 'fiches' will be selected specifically for you based on your analysis. Our tool will not only facilitate the learning process, but also provide a personalised approach to the circular economy, allowing you to successfully implement these principles in your companies. But that's not all - this methodology can be used in any area where you need automated skills diagnosis and the provision of personalised resources.

We are convinced that our tool will transform the way you join the circular economy. Therefore, we will soon be encouraging you to use these valuable 'fiches' and realise their potential in your endeavours.

More importantly, we are working on translating these materials so that even more people can benefit from them. They will soon be on our e-learning platform, available to all interested parties.

Stay tuned as we will soon make these valuable resources available. With them, you will be able to improve your skills and grow in many areas. This is just part of our efforts to provide you with valuable educational content.

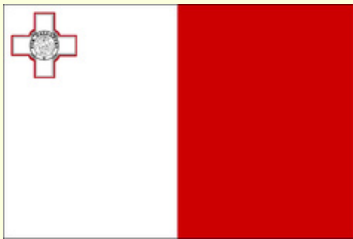

DISCERN 3rd Transnational Meeting

On 30 and 31 May 2023, the third meeting took place in a friendly atmosphere in Rzeszów, Poland. During this meeting, the participants had the opportunity to discuss the progress of the project, the assigned tasks for each partner and strategies for the promotion and dissemination of the project. In addition, future plans for the Learning, Teaching, and Training Activities (LTTA) to be held in Malta in October were discussed.
